

Science Fair

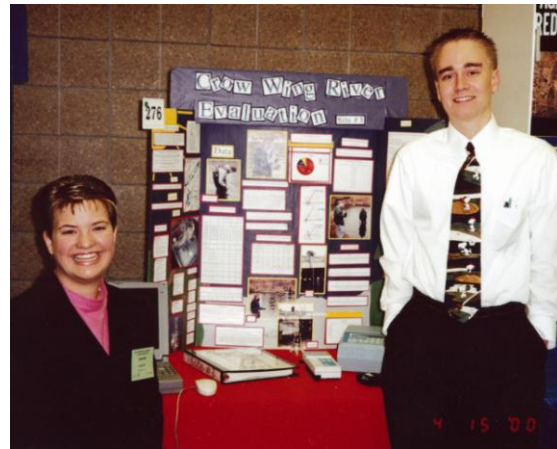

The first Science Fair was held at Nevis School in February 1999. The science fair was for all students in grades 6-8. The following year, students in Mrs. Sandmeyer's high school Aquatic Management class also participated and for the next three years, students from that high school elective class advanced to the state competition. After Mrs. Sandmeyer became the principal at Nevis School, Mr. Uscola took over coordinating the science fair and students in grades 6-8 participated. Therefore, all state participants from 2003-2004 to present have been 8th grade students.
